SUMMARY

Dynamic Software Developer with nearly **4 years of experience** in web development and product enhancement. Proven expertise in optimizing front-end interfaces using **Tailwind CSS** and building complex **real-time applications**. Specialized in the **Ruby on Rails** ecosystem and modern JavaScript frameworks, with a commitment to delivering clean UI/UX and scalable production features.

WORK EXPERIENCE

Software Developer, Really Good Software 10/2022 – 12/2025
Remote

- Delivered and maintained **15+ production features** in a multi-tenant Ruby on Rails application, supporting **5+ client tenants, 100+ contracts, and 1,000+ contractors submitting timesheets**, improving overall system reliability across long-term project cycles.
- Built real-time chat using **Action Cable**, supporting **300+ concurrent users**, implementing presence and typing indicators with efficient broadcasting to deliver near real-time interactions.
- Designed and implemented a **DST-safe, multi-timezone interview scheduling system**, reducing scheduling conflicts and timezone-related issues for globally distributed users.
- Developed secure file upload pipelines using **Active Storage with S3-compatible storage**, supporting timesheet and attachment uploads via direct uploads and background processing to optimize performance and reduce server load.
- Rebuilt and modernized front-end components using **TailwindCSS**, improving responsiveness and reducing UI-related issues across mobile and desktop.
- Collaborated cross-functionally to ship maintainable features using **clean Rails patterns (partials, helpers, service-oriented logic)**, improving code readability and long-term maintainability.

Web Developer, Sun Asterisk 05/2022 – 10/2022
Remote

- Sustained and enhanced a school management system for teachers and staff, ensuring its reliability and functionality.
- Developed new UI screens, resolved bugs, and boosted front-end performance.
- Facilitated feature releases and QA cycles, while guaranteeing platform stability under high usage.

EDUCATION

Full Stack Developer, Avion School 2021 – 2022
Remote

- HTML, CSS, JavaScript, React, Rails Projects: Moonbank, Chess, Slack App

ICT - Computer Animation, AMA Computer College 2016 – 2018
Remote

- Vanilla JavaScript, HTML/CSS, SQL basics

SKILLS

- Ruby
- React Native
- React
- TailwindCSS
- TypeScript
- HTML
- Object-Oriented Programming
- GitHub
- Scalable interfaces
- JavaScript
- Rails
- Turbo/Stimulus
- ActiveAdmin
- Multi-tenant apps
- CSS
- Debugging
- AI APIs
- Workflow problems

LANGUAGES

- English

CERTIFICATES

- Web Development III
JavaScript E-Global

Personal Projects

Cola [🔗](#), *Real-time Collaborative Canvas*

- Developed a collaborative workspace featuring a real-time drawing canvas and chat system.
- Implemented WebSocket-based mirroring and broadcasting using Action Cable to ensure seamless multi-user interaction.
- Deployed and managed the application on Fly.io [🔗](#).

Adminer, *A multi-tenant SaaS engine designed to scale business operations through granular subscription logic and real-time state management.*

- Manage multiple business profiles in one account, each with its own operations.
- Invite members, assign roles, and control access for clean team ownership.
- Create services, manage bookings, and keep customer schedules in one workflow.

Client Projects

Naoi

- Built and maintained scalable features in a multi-tenant Ruby on Rails application supporting thousands of users across multiple clients.
- Developed and optimized workflows for contractor management, timesheets, and contract lifecycle processes.
- Improved system reliability and performance by debugging production issues and refining backend logic.
- Collaborated cross-functionally to deliver user-focused features across long-term product cycles.
- Implemented clean, maintainable code following modern frontend practices using React and Tailwind CSS.

Greenore

- Developed full-stack features (Rails + React) for a production web app, improving performance and user experience.
- Fixed production bugs, refined UI/UX, and supported continuous feature delivery in an agile environment.
